

# Nitragin® Gold

## Pre-inoculant nitrogen-fixing bacteria for alfalfa and clover

### Add value to your seed and for your seed customers by requesting Nitragin® Gold from your processor

#### Super seed adhesion

- Micron-sized particles ensure superior seed adhesion and minimal “dusting off”

#### Ease of application

- Can be used in either a continuous flow or batch treating system

#### Quality assurance and support

- Patented slow-drying system assures customers of high rhizobia levels on the seed

#### Yield

- Specially selected natural rhizobia strains result in high levels of nitrogen fixation for maximum yields

#### Alfalfa

- Treats all alfalfas and sweet clovers, (white, yellow, hubam, madrid, bitter, and sour clover)
- Time on seed: 2 years

#### Apron® XL / Allegiance® FL compatible

- Nitragin Gold compatibility with Apron XL and Allegiance FL ensures the combined benefits of an inoculant and a fungicide where required

#### Quality

- Guaranteed rhizobia counts lead the industry in quality. Both products' high bacterial count is very stable for excellent longevity
- Nitragin Gold does not contain any GMOs, sludge or waste-derived products

#### Clover

- Treats ladino, alsike, red, and white clovers
- Time on seed: 1 year

Novozymes is the world leader in bioinnovation. Together with customers across a broad array of industries we create tomorrow's industrial biosolutions, improving our customers' business and the use of our planet's resources.

### Product details

#### Nitragin Gold alfalfa and sweet clover

Packaging:	1 x 42 lb (19 kg)
Crop:	Alfalfa and sweet clover
Application:	On-seed
Package treats:	2,273 kg (5,000 lb) of seed

### Product details

#### Nitragin Gold clover

Packaging:	1 x 42 lb (19 kg)
Crop:	Clover
Application:	On-seed
Package treats:	Red clover 2,273 kg (5,000 lb) of seed
	White, Ladino, Alsike clover 1,136 kg (2,500 lb) of seed
