To Whom It May Concern:

The active microbial ingredients in Novozymes' BioAg inoculants JumpStart®, JumpStart® LCO, TagTeam®, TagTeam® LCO, Optimize®, Optimize® Gold, Cell-Tech®, Cell-Tech® NS, Nitragin Gold®, QuickRoots®, MicroMix®, Challenge 2050® and GreenBean® are naturally-occurring, beneficial microorganisms. We do not manufacture or sell any inoculants that contain genetically-modified organisms (GMO's) as their active ingredients.

The active microbial ingredients in Novozymes' biocontrol products Met52® granular, Met52® EC, Taegro®, Actinovate® SP, Actinovate® AG, Actinovate® Lawn and Garden, Actino-iron®, Actino-iron® Lawn and Garden, Actinovate® STP and NOFLY® WP are naturally-occurring microorganisms. We do not manufacture or sell any biocontrol products that contain genetically-modified organisms (GMO's) as their active ingredients.

The above statements are applicable to our inoculants and biocontrol products sold in Canada and the United States. If you have any questions, you can reach me toll free at 1-888-744-5662 or review our website at www.bioag.novozymes.com for further information.

Yours truly,

Dean Thome
Regulatory Affairs Manager
Novozymes BioAg Limited
